

**ROCKY FLATS ENVIRONMENTAL TECHNOLOGY SITE  
REGULATORY CONTACT RECORD**

**Date/Time:** April 1, 2004 / 1000

**Site Contact(s):** Dyan Foss  
**Phone:** 7577

**Regulatory Contact:** David Kruchek  
**Phone:** 303-692-36328

**Agency:** CDPHE

**Purpose of Contact:** Building 881 Openings to the Environment

**Discussion**

In order to prepare Building 881 for demolition, asbestos flashing and the parapet needed to be removed from the roof to allow access for drilling. While removing the parapet along the annex on the northwest side of the building, several small gaps were made between the exterior wall and the metal roof.

The rooms below these gaps have been pre-demolition surveyed and are at unrestricted release, but the surveys have not been reviewed or approved by CDPHE. In addition, these rooms have been separated from the rest of Building 881 with plastic containments. Since the surveys have not been approved by CDPHE, the integrity of the building shell will need to be maintained, which will prevent cross contamination from outside and the need to re-survey these areas.

The gaps had been covered with plastic and anchored with sandbags. However, during a walk down with CDPHE and DOE, a couple of the gaps had become uncovered. The gaps will be recovered with two layers of plastic, and a routine inspection of the plastic will be implemented to ensure that the plastic remains in place.
