Discussion

In a meeting on 4-1-02 to discuss the PDSR for Bldg. 886 J.R. Marschall requested permission to place that concrete from the Bldg. 886 concrete or block walls, slabs and foundations meeting free release criteria onto the site rubble pile. Concrete blocks from the floor of room 101 that were left in place after being painted with fixative and covered with cardboard and steel plates bolted to the blocks do not meet the free release criteria and will be placed in SCO containters for shipment to a proper disposal site. The removal of the rest of the slab and foundations in Bldg. 886 will be monitored by an RCT and any that do not meet free release criteria will also be placed in the SCO container(s).

Mr. Kruchek and Mr. Tower agreed with placing concrete walls, slabs and foundations meeting free release criteria onto the site rubble pile.
