Denver, CO 80246-1530

Mr. Mark Aguilar
United States Environmental Protection Agency, Region VIII
999 18th Street, Suite 500
Denver, CO 80202-2466

Dear Mr. Gunderson and Mr. Aguilar:

Enclosed are copies of the Present Landfill Accelerated Action Closeout Report which includes the Present Landfill (PLF) Construction Certification Report (CCR) as an enclosure. Three copies of Volume I are provided which includes the Closeout Report and the main text and "as-built" drawings of the Construction Certification Report. One copy of Volume II through IV, as we have previously discussed and agreed to, is provided and encompasses all of the Appendices to the Construction Certification Report.

The groundwater well completion logs are not included in the appendices at this time, since the groundwater wells are just now being installed. These logs will be forwarded to you as an insert as soon as they are completed. The backup for the East Face stability calculations are being provided to you today for your review. Additionally, we are currently evaluating options for storm water drainage management at the toe of the East Face. We will contact you shortly to discuss the options and our proposed solution, which will be documented through a contact record. The final CCR will include "as-built" drawings documenting the agreed upon approach for the East Face.

We respectfully request that we receive your review comments within three weeks and no later than July 14, 2005.
