**Modification to Programmatic Biological Assessment
June 8, 2005
Modification # 05-06-02
Connexs Near Pond B-3
Classification Exemption CEX-105-01**

The following modification is made to the Programmatic Biological Assessment (PBA) Part II pertaining to a disturbance in South Walnut Creek. Three connexs have been temporarily placed in a previously undisturbed area, 0.0117 acres, of PMJM habitat but within the already established footprint of the B-Pond Remediation and Dam Notching Projects. They were placed there on approximately May 15, 2005 and will be removed on or before June 17, 2005. The connexs contain replacement material for the East Trenches Treatment System. This area is of lower quality habitat and the 0.0117 acres will be a temporary loss. This loss will be tracked as part of the South Walnut Creek Projects.
