Mr. Gary Baughman
Hazardous Waste Facilities Unit Leader
Colorado Department of Health
4300 Cherry Creek Drive South
Denver, Colorado 80222-1530

Gentlemen:

Please find enclosed two (2) draft maps of High Purity Germanium detector (HPGe) data for individual hazardous substance sites (IHSSs) in the industrial area of the Rocky Flats Plant (Operable Units 8, 9, 10, 12, 13 and 14). These maps are provided for your information. In addition, we have provided two copies of the HPGe data in a tabular format.

The gamma ray spectroscopy data have been converted to surface soil activity. When the vertical soil profile samples have been collected, analyzed and evaluated, the surface soil activity may be modified based on the observed depth distribution of radionuclides in surface soil.

The enclosed data will be used to identify locations where more detailed HPGe and/or Sodium Iodide detector measurements will be made during our current Stage 1 nonintrusive activities. In the near future, we will set up an informal meeting with your staff to discuss locations requiring more detailed surface activity measurements.

Any questions or concerns regarding this transmittal should be directed to Mr. Bob Birk of my staff at 966-5921.

Sincerely,

Jessie Roberson
Jessie Roberson
Acting Assistant Manager for
Environmental Restoration
