SUBJECT: THREATENED AND ENDANGERED SPECIES AND MIGRATORY BIRD
CLEARANCE FOR UNDERGROUND STORAGE TANK CLEANOUT AND
DECOMMISSIONING PROJECT - MBM - 004 - 96

At your request Ecology personnel inspected the work areas for the underground storage tanks that will be pumped, cleaned, foam-filled, and abandoned in place. The work locations are in heavily disturbed or paved over locations. No threatened and endangered species and migratory bird concerns were identified at the tank locations. Work may proceed as scheduled. Due to the highly disturbed nature of these locations, no repeat surveys will be required at the work sites. Should the current project be greatly revised, or should a new phase of the project start, new or additional surveys will be required.

Should you have comments or require further information, please call me at extension 3560.
