Purpose of Contact: Clarify storage requirement for secondary waste generated during removal of sludge from T231 A & B tanks

Discussion

Since secondary waste generated during removal of sludge from tanks T231A&B were not specifically addressed in the Tank Management Plan we were storing the secondary waste from the T231 B sludge removal in the T231 area until the project was complete James Hindman suggested the secondary waste generated during the T231 A sludge removal be managed in a 90-day unit James also agreed to discuss other storage options at a later date, if necessary This includes the waste generated during the recovery from the spill on November 22, 2002 from T231A sludge removal
