Golden, CO 80403-8200

RE: Reconnaissance Level Characterization Report (RLCR) and Pre-Demolition Survey Report (PDSR)  
for Building 441 - Concurrence and Approval

Dear Mr. DiSalvo:

The Colorado Department of Public Health and Environment, Hazardous Materials and Waste Management Division has reviewed the RLCR for Building 441, Revision 0 dated January 23, 2003, received on February 6, 2003. Utilizing the consultative process the Division raised concerns with Revision 0 that were addressed and included in a revised document provided for our concurrence. The new document is the RLCR and PDSR Revision 1, dated February 11, 2003. Based on the information contained in the Revision 1 RLCR/PDSR, we are hereby concurring with the determination that B441 is a Type 2 Facility.

We are also approving the PDSR for B441, recognizing that there remains some asbestos and radiological contamination on the slab in B441 that, as indicated, will be properly identified, protected, and remediated by either D&D or ER after the superstructure has been removed. As also indicated, due to the potential internal contamination, the laboratory portion of the slab will not be considered recyclable.

If you have any questions regarding this correspondence please contact me at (303) 692-3367 or David Kruchek at (303) 692-3328.

Sincerely,

Steven H. Gunderson  
RFCA Project Coordinator
