---

## **Discussion**

On September 24, approximately 15:30, Dave Kruchek inspected the 996 tunnel to be sure that all ducts, conduits, asbestos, piping, and a Health/Physics pump had been removed from the tunnel. Previously Dave had given permission for the vault doors, small lengths of unistrut, and small miscellaneous steel pieces to be left in place. Dave was satisfied with the condition of the tunnel and gave J.R. Marschall approval to seal the final 4' of the tunnel with expansive foam. That task was successfully performed the following morning.
