Agency CDPHE

Purpose of Contact IHSS Group 600-3 - Moved sample location

Discussion

Characterization of IHSS Group 600-3 (IHSS 120 1 B668 area) has begun. Statistical sampling location CA36-031 is located beneath one of a series of conexs staged in this area. This sample location is near historical samples previously collected in this area. At these locations, no analytes approached action levels. Therefore, this sample location will be moved to the northwest corner of IHSS 120 1 in the rectangle defined by the southern edge of the western conex and the IHSS boundary. This location is in the area of a previously sampled location with an elevated beryllium concentration.
