Purpose of Contact Elimination of VOC samples from 'A' interval due to asphalt removal

Discussion

When the 500-2 SAP Addendum (IA-03-07) was approved, it specified that VOC samples were to be collected in the 'A' interval. These sample specifications were a direct result of the area being covered with asphalt. However, between the approval of the SAP and its execution, the asphalt was removed as part of the D&D of Bldg 551. Since the asphalt has been removed, the need for VOC collection in the 'A' interval was deemed as no longer being valid. Therefore the following modifications to the SAP Addendum were agreed upon and will be addressed in the resulting Closeout or Data Summary Report.

- VOC samples will not be collected in the 'A' interval in areas no longer covered by asphalt
- Samples were planned for the A & C intervals at locations CA42-033 and CA42-032, the former loading dock locations at B553. Because the loading docks are gone, samples will be collected at the A and B intervals, C intervals were already collected
- Collection of VOC samples in the 'B' interval will continue according to the SAP
