Agency CDPHE

Purpose of Contact Agreement of proposed SAP Addendum sampling locations in drainage to Bowman's Pond (IHSS Group 700-11, #IA-04-10)

Discussion

Met with Mr Harlen Amscough at Bowman's Pond to discuss the proposed sampling locations in the drainage leading into the pond During the field check it was agreed by all parties to sample three locations in the drainage These locations were originally proposed and approved in the SAP Addendum for 700-5 (UBC770), however, the data results will be included in the Closeout Report for 700-11 as well

The first location (CG49-012) targets runoff from B770 in an open concrete channel near the downspout on the southeast corner of the building The second sample targets the influent to the east-west trending culvert that leads to the pond This sample (CG49-015) is also located directly downgradient of a north-south trending storm drain leading away from B774 The third location (CG49-016) is located in the upstream cattail area of the pond and directly downgradient of a second storm drain from the B774 area This third location is also near the location of the highest recorded PCB detections in the area, therefore, this sample will include analysis for dioxins

Mr Amscough was informed that the 700-11 SAP Addendum would have the agreed upon locations incorporated into the document along with previously discussed and resolved comments from the March 4, 2004 Comment Resolution Meeting at the Mountain View office
