Agency CDPHE

Purpose of Contact Sampling Changes at IHSS Group 500-1, Locations CC42-021 and CC43-009

Discussion

The purpose of this ER Contact Record is to confirm approval of two sampling changes from the Industrial Area Sampling and Analysis Plan (IASAP) Addendum for IHSS Group 500-1, #IA-04-03

- Table 4 of the IASAP Addendum shows that four sample intervals will be collected at Location CC42-021. However, the text says that sampling locations between the locations of the former Protected Area fences will only be sampled at the D interval (4.5 – 6.5 ft) because the top 4 – 5 ft consist of clean fill. Therefore, only the D interval will be sampled at Location CC42-021, as is being done at all of the other locations between the fences.
- Table 4 shows that the sampling intervals at Sampling Location CC43-009 will be analyzed for dioxin/furan to ensure that 10% of the samples analyzed for PCBs will be analyzed for dioxin/furan. However, CC43-009 was sampled, and samples for dioxin/furan were not taken. Therefore, samples for dioxin/furan will be taken from an adjacent location, CC44-005, that includes PCB analysis.
