RE: Building 964 Facility Component Removal, Size Reduction, and Decontamination Activities RSOP (Component RSOP), Six Point Analysis and Type 2 Concurrence

Dear Mr. Legare:

The Colorado Department of Public Health and Environment, Hazardous Materials and Waste Management Division has received your June 23, 2004 letter with the Six Point Analysis of B964 as specified in Section 3.8.1 of the Component RSOP.

On May 17, 2004, we previously provided concurrence for the closure activity for RCRA Unit 24 according to the Component RSOP Notification information, which was provided to us. After discussing the information provided, as well as information that was inadvertently left out of the information package, which was supposed to have been previously provided to us, we agree that sufficient information has been collected to properly characterize B964. Therefore, we concur that B964 is a Type 2 Facility and that it is not necessary to provide a formal RLCR for B964.

In addition, based on the proposed component removal activity to be performed, which will remove some, if not all, of the exterior siding and roof of B964, and the Six Point Analysis provided, we agree that this activity may occur utilizing the Component RSOP, as well as the previously agreed closure of RCRA Unit 24.

If you have any questions regarding this correspondence please contact me at (303) 692-3367, David Kruehek at (303) 692-3328.

Sincerely,

Steven H. Gunderson
RFCA Project Coordinator
