Steve N: We have OIS's concurrence as noted below. Lets put the final touches to it. Harlen

Marilyn Hajicek <marilyn.hajicek@state.co.us> 07/23/04 08:06AM >>>
Harlen,

I concur that rather than perform tank remediation under a separate PAM as specified in Attachment 13 (i.e. the March 13, 1996 closure letter agreement between OIS and CDPHE) of the Rocky Flats Cleanup Agreement (RFCA), the closure will be covered administratively and technically under the environmental restoration provisions of RFCA.

Subject: Rocky Flats Diesel Tank Concurrence

Hello again Marilyn. Attached is a Regulatory Contact Record of a discussion I had with Mr. Steve Nesta of Kaiser-Hill at Rocky Flats regarding the closure of 4 x 20K diesel tanks, and leaks, near Building 443.

That discussion mirrors the discussion you and I had by telephone on Wednesday July 21. To recap, rather than perform tank remediation under a separate PAM as specified in Attachment 13 (i.e. the March 13, 1996 closure letter agreement between OIS and CDPHE) of the Rocky Flats Cleanup Agreement (RFCA), the closure will be covered administratively and technically under the environmental restoration provisions of RFCA.

4

As I indicated previously, I am pursuing this approach under the direction of the department's Rocky Flat's Project Coordinator, Mr. Steve Gunderson.

Your reply and concurrence by e-mail will be sufficient to finalize our discussions with the facility. We'll then note your concurrence on the Contact Record and include you in the e-mail distribution of the final version.

Thanks for your assistance on this issue.

**ROCKY FLATS ENVIRONMENTAL TECHNOLOGY SITE
ER REGULATORY CONTACT RECORD**

Date/Time: July 21, 2004 / 1400

Site Contact(s): Steve Nesta
Phone: 303-966-6386

Regulatory Contact: Harlen Ainscough
Phone: 303-692-3337

Agency: CDPHE

Purpose of Contact: Soil Remediation from B443 Oil Leak at IHSS Group 400-7, IHSS 129

Discussion

Discussed the remediation of the soil around B443 that is contaminated from the underground storage tanks that leaked #6 diesel oil. KH proposes to conduct the remediation under the ER RSOP versus a Proposed Action Memorandum (PAM). The cleanup criteria proposed and agreed to meets the intent of RFCA Attachment 13 cleanup criteria of 5000 ppm total petroleum hydrocarbons (TPH) for these four tanks, and is consistent with the 20 tanks done previously as part of Attachment 13. The four tanks will be removed, soil cleaned up to at least 5000 ppm TPH, and clean fill placed in the area.

(Note: The ER RSOP covers soil removals for such accelerated actions and was developed subsequent to, and effectively supercedes, Attachment 13.)
