Purpose of Contact: Request a 30-day extension to 90-day Area, Unit 4169

Discussion

The Waste Chemical Program has recently packaged several containers of waste chemicals for Building 891. One of these containers is a drum containing pressurized gas chemicals (container number W15079). This drum cannot be transferred to the one remaining LLW permitted storage unit on site, because pressurized gas has not been analyzed in the Nuclear Safety Authorization Basis. The container is scheduled to be shipped offsite on 3/29/05; however, the 90 period for this container expires on 3/21/05. The offsite shipment date cannot be re-scheduled to a sooner date, so a 30-day extension in accordance with Part 262.34(b) has been requested for Building 891, Unit 4169.

Harlen has reviewed and approved this request.
