Operable Unit 1 (881 Hillside) Draft RFI/RI Report Comments

*Bob*  
Robert Benedetti, Associate General Manager  
Environmental Restoration Management  
EG&G Rocky Flats, Inc

DOE Headquarters and B Thatcher's comments on the Draft RCRA Facility Investigation/Remedial Investigation Report are attached. In addition we have the following general comment.

Much emphasis is placed on the saturated area surrounding the collection well being of limited areal extent. In preparation of the Final report, an increased effort to model the hydro-geology must be done. In order to best represent the hydro geology and limited quantity of water the area is to be modeled using the Dynamic Graphics 3 Dimensional (3 D) software (currently licensed to EG&G). Of particular interest is a 3 D representation of the geology the saturated thickness (and areal extent) and the concentration of contaminants.

A presentation of a draft 3 D model will be due to be presented to Paul Singh by March 15 1993. If you have any questions about this please contact Paul Singh at extension 4651.

*James K. Hartman*  
James K. Hartman  
Assistant Manager  
for Environmental Management
