Request for Modifications to the Final Biological Survey Report and the Final Habitat Survey Report

J. M. Kersh Associate General Manager  
Environmental Restoration and Waste Management  
EG&G Rocky Flats Inc

Please find attached one copy each of the following EG&G Rocky Flats Inc reports

- 1) Endangered Species Act Compliance Proposed 881 Hillside French Drain (881 HFD) Project Final Biological Survey Report dated October 1991 and
- 2) Fish and Wildlife Coordination Act/Migratory Bird Treaty Act Compliance Proposed 881 Hillside French Drain (881 HFD) Project, Final Habitat Survey Report, dated October 1991

We request that the reports be modified per the comments within the body of the enclosed texts. Note that several significant comments submitted by fax to EG&G Rocky Flats Inc NEPA Division on October 22 and 23 1991 have not been addressed in the latest versions. For report no 2 above this includes the first paragraph in Section 6.0. For report no 1 above this includes paragraph two in Section 5.4 on page 7 and paragraph two in Section 6.0 on page 8. These latter comments relate to hydrology calculations for the Plate River Drainage Basin which have not been incorporated into the latest version of this report. This report cannot be submitted to the U.S. Fish and Wildlife Service (FWS) without the necessary hydrology information that FWS indicated to DOE/RFO and EG&G Rocky Flats Inc at the October 10 1991 meeting with their hydrologists.

Additional comments are included that should be addressed as well. A portion of the additional comments are due to the fact that the 881 HFD is under construction and therefore is no longer proposed.

As compliance with these statutes is of concern to DOE/RFO we request that the above two reports be modified per the attached comments and resubmitted to DOE/RFO/ERD no later than November 29 1991.
