RE OU 1 Technical Memorandum 2

Dear Mr Lockhart

EPA has reviewed Technical Memorandum 2 Response to August 1 1991 EPA Comments on the Operable Unit No 1 RFI/RI Work Plan dated August 20 1991 EPA would like clarification on two responses in the memorandum prior to approving the memorandum

The first point pertains to comment number three sampling for NAPLS Clarification as to which wells will undergo sampling for NAPLS is necessary A table showing sample locations where previous data indicate the presence of elevated chlorinated solvents and the concentrations of the contaminants would be useful

The second point pertains to comment number four adequate air monitoring It is necessary to demonstrate how the existing air monitoring system is sufficient for completing an adequate baseline risk assessment The air monitoring program for OU 1 needs to specifically address concerns related to OU 1 and not just site wide activities A map showing the locations of air samplers that will be used in the baseline risk assessment and their relation to OU 1 IHSSs would be helpful

If you or members of your staff have question pertaining to these issues please contact Patricia Corbetta at (303) 294-1071

Sincerely

for Martin Hestmark, Manager
Rocky Flats Project
