Gentlemen:

Enclosed for your review is the Final Technical Memorandum No. 10 (TM 10), Remedial Action Objectives for Operable Unit No. 1. This document is an Interagency Agreement (IAG) deliverable. We are requesting your comments by September 17, 1993.

You will notice that certain sections of the document (Contaminants of Concern by Media, Potential Exposure Routes (Pathways) and Receptors, etc.) have a caveat pending approval of the Final Phase III RCRA Facilities Investigation/Remedial Investigation (RFI/RI) Report. This points out a flaw in the current IAG schedule which necessitates the preparation and approval of the Technical Memoranda for the Corrective Measures Study/Feasibility Study (CMS/FS) prior to issuance of the Final RFI/RI Report. This problem makes it difficult for you to approve this Technical Memorandum and for the Department of Energy to continue work on the Draft CMS/FS Report.

If you have any questions, please contact Richard Schassburger at 966-4888.

Sincerely,
