TRANSMITTAL OF TECHNICAL MEMORANDUM 2 - CHEMICAL ANALYSIS PLAN FOR OPERABLE UNIT NUMBER TWO (OU 2) PHASE II RCRA FACILITY INVESTIGATION/REMEDIAL INVESTIGATION (RFI/RI) WORK PLAN (ALLUVIAL) - JEE-0326-91

The enclosed subject workplan is provided to DOE for transmittal to the Environmental Protection Agency (EPA) and the Colorado Department of Health (CDH) for their formal review and approval in accordance with the Interagency Agreement (IAG). This final version of Technical Memorandum 2 incorporates Department of Energy (DOE) and EG&G Rocky Flats responses to informal comments made by EPA and CDH.

The comments by EPA and CDH have been reviewed by DOE and EG&G Rocky Flats, and revisions to the text were made where applicable. This Chemical Analysis Plan amends the second version of the OU 2 Phase II RFI/RI Work Plan (alluvial) that was issued August 19, 1991 as Technical Memorandum 1 in accordance with the IAG.

The alluvial work plan is the first part of a two-part work plan. The second part is the bedrock work plan. Both documents describe field activities that will yield information on contamination sources and plumes beneath the 903 Pad, Mound and the East Trenches areas which will be summarized into one Remedial Investigation report (draft) due in March 1993 as an IAG deliverable.

If you have any questions regarding this Technical Memorandum 2 or related issues, please contact E. H. Wilson at extension 3200 of Remediation Programs.

J. E. Evered, Director
