Attn: D. P. Simonson

FLOODPLAIN ASSESSMENT AND PUBLIC NOTICE FOR SOUTH WALNUT CREEK, OPERABLE UNIT 2 (8162) - JEE-0339-91

Attached are copies of the referenced documents, revised as requested. The apparent redundancy of material in the Floodplain Assessment was the result of the inadvertent inclusion of a second sheet to that document. We have also deleted use of the future tense in the Federal Register Notice as requested. Portions of the original submission were written in the future tense because much of it described conditions which, even though the project is presently under construction, are still in the future, i.e., will exist when construction of the project is complete.

Though not requested, we have modified the Floodplain Assessment to delete use of the future tense and make that document consistent with the Federal Register Notice.

Finally, using the words of the regulation, material has been added to the Floodplain Assessment making explicit the fact that the absence of impacts to the floodplain means there will be no positive, negative, direct, indirect, long-term or short-term effects.

If you have any questions or need more information, please contact Steve Nesta on 273-6076 or Bill Moore on 273-6217.

J. E. Evered, Director
Environmental Management
