4201-DOE-91

Mr. Gary Baughman
Hazardous Waste Facilities Unit Manager
Colorado Department of Health
4210 East 11th Avenue
Denver, Colorado 80220

Gentlemen:

Enclosed is the Final Past Remedy Report, Operable Unit No. 3 - IHSS 199, which addresses your comments to the document submitted April 2, 1991, in accordance with the IAG schedule. This submittal meets your May 1, 1991 letter request for modifications by May 24, 1991.

We would like to point out that the dispersion and depositional modeling used in the generic risk characterization (APPENDIX C) has been described in far greater detail and is the appropriate model for Operable Unit No. 3.

The demographic information requested for Section 1.2 has not been included at this time, as we do not believe it is of sufficient accuracy to be useful. A separate study by the NEPA organization is currently in progress, and demographic information from that study can be used in the upcoming Operable Unit. No. 3 RFI/RI.

If you have any questions, please feel free to contact Robert H. Birk of my staff at 966-5921.

Sincerely,

David P. Simonson
Assistant Manager
for Environmental Management
