Release of OU-3 Data to CH₂MHill for Use in the Standley Lake Diversion Project Risk Assessment

Bob Benedetti
Associate General Manager
Environmental Restoration
EG&G, Rocky Flats, Inc.

Mike Guillaume
Project Manager
Operable Unit 3
EG&G, Rocky Flats, Inc.

The Environmental Monitoring Branch of the Department of Energy, Rocky Flats Office (DOE/RFO) has received a request from the City of Westminster for unvalidated data being received on Operable Unit 3 (OU-3) sampling locations for use in the risk assessment currently being compiled for the Standley Lake Diversion Project. Westminster has asked that this data be released to CH₂MHill, the engineering firm preparing the risk assessment.

It has been determined that this unvalidated data can be released to CH₂MHill, however, they should be advised that the data is of limited use, and is restricted for use in the Standley Lake Diversion Project risk assessment only. All of the data given should be screened by the EG&G OU-3 project manager, all anomalous and high values should be asterisked and noted that the values are unvalidated, and the results reviewed and approved by DOE/RFO before issuing this data.

If you have any questions concerning this matter, please contact Bob Birk at extension 5921.
