## EVIDENCE OF READINESS TO PROCEED WITH OPERATIONS OF THE BUILDING 910 EVAPORATOR OPERATIONS - SRK-134-93

Ref: S. R. Schassburger ltr, (06771) to S. R. Keith, DOE, RFO-ERD Building 910 Sub-project  
Special Assessment Findings, June 11, 1993

EG&G Rocky Flats, Inc. (EG&G), has successfully completed its graded approach Self-Assessment supporting startup of operations for the Building 910 (B910) evaporators, with the exceptions as identified within the Evidence of Readiness Report (attached).

The Evidence of Readiness Report provides a summary of the graded approach employed and the Self-Assessment activities that have been completed. The Report also includes a summary of the Findings resulting from both the EG&G Self-Assessment and the DOE, RFO-ERD Special Assessment, defines all activities (i.e., Findings or Open Items) that remain open as of the date of this transmittal, and identifies the current schedule for closure of each of these open activities. (Additional detail is provided in Attachment 2 of the Report.)

EG&G recognizes that the remaining work scope (Pre-Startup actions) must be completed prior to actual (i.e., "hot") systems operations and is confident that the required baseline documentation and program implementation elements are in place.

In accordance with the defined scope and milestone commitments of the Interim Measure/Interim Remedial Action (IM/IRA), documentation and controls in the following areas have been assessed, with the open actions as noted, as supportive of safe and prudent operations:

- 1) criticality safety;
- 2) engineering;
- 3) environmental management;
- 4) fire protection;
- 5) health and safety;
- 6) medical/occupational health;
- 7) nuclear safety;
- 8) operations;
- 9) procedures;
- 10) process alarms;
- 11) project management;
- 12) quality;
- 13) records management;
- 14) safeguards and security;
- 15) training; and
- 16) waste management

Page 2

Based upon the preceding information and the information provided in the attached Report, EG&G has concluded that it is safe to start operation of the B910 evaporators and that such operations will provide compliant control of the low hazard materials involved. Therefore, EG&G recommends that the Department of Energy grant EG&G a Declaration of Readiness to Operate.

Should there be questions regarding this Report, please contact Don A. Ringle, Manager, SPP Project Management Systems, on extension 8603.
