RE: ASRP Tank Certifications

Dear Mr. Beckman:

Enclosed are the initial tank certifications for the fourth group of tanks that have been installed and tested in Tent 4 at the plant. The document is organized to provide the initial certification and summary comments in the text and the details in the form of check sheets and calculations in the appendices. The text and the check sheets have been modified to incorporate the additional information that CDH requested concerning the tank foundations. We have identified some discrepancies which need to be corrected before final certification is provided. This may include additional tank wall thickness information to resolve current limitations on tank usage. These documents will be followed with a final certification package after the last tank has been installed.

Once again, ERM appreciates the opportunity to work with your group on this project.

Sincerely,  
ERM-Rocky Mountain, Inc.

  
Peter Bierbaum, P.E.  
Principal

  
Michael Keller, P.E.  
Senior Engineer
