SOLAR EVAPORATION PONDS-OU-4 DOCUMENTATION TRANSMITTAL OF DRAFT "ENVIRONMENTAL EVALUATION WORKING DOCUMENT" FINAL REPORT "HEALTH AND SAFETY PLAN", AND EPA/CDH "COMMENT RESPONSIVENESS SUMMARY OF OU-4 VADOSE ZONE TECHNICAL MEMORANDUM" - EML-133-93

EG&G Rocky Flats, Inc. is hereby transmitting three documents, as referenced above, associated with the Solar Evaporation Ponds (SEP), Operable Unit 4 (OU-4) Phase I RFI/RI Program. The "Final Report Health and Safety Plan, Phase I RCRA Facility Investigation/Remedial Operable Unit No. 4" is being provided to you for your interest/records. EG&G is not soliciting comments from DOE for this document. A total of two copies of the Health and Safety Plan are being transmitted to DOE.

Seven copies of "Comments Responsiveness Summary for the Vadose Zone Technical Memorandum" are being transmitted to DOE for review and comment. This document is being proposed as a "conceptual" approach to implementing the ecotoxicological program for OU-4. The primary intent of this document is to provide the framework for the ecotoxicological investigation for OU-4 and obtain DOE, EPA and CDH approval to this approach. In the event approval is obtained for this approach, EG&G Rocky Flats will develop an OU-4 Environmental Evaluation Technical Memorandum for review and comment. EG&G's rationale for utilizing this mechanism is that we believe the OU-4 Environmental Evaluation from the Phase I RFI/RI Work Plan is obsolete due to development/progressions within the Rocky Flats Plant Environmental Evaluation program/strategy. Comments on this document are requested to be submitted to EG&G by Tuesday, February 8, 1993.

If you have any questions or concerns pertaining to these documents or issues, please contact R. T. Ogg of my staff on extension 8608.
