Mr. Joe Schieffelin, Unit Leader
 Hazardous Waste Facilities
 Colorado Department of Public Health and Environment
 4300 Cherry Creek Drive South
 Denver, Colorado 80222-1530

Gentlemen:

Last January, in order to meet our schedule commitment to the State of Colorado, the Department of Energy (DOE) used metal crates to supplement tanks for the storage of sludge from Solar Evaporation Pond 207 C. In this letter, the DOE provides our management plan for those crates, as requested by your representative during an inspection on February 10, 1995.

The DOE feels the storage in the crates complies with the State's regulations and requirements. We plan, however, to transfer the sludge into tanks. While a review of the crates and the stored waste indicates that the crates would be adequate containers for the temporary storage period planned, storage in tanks was DOE's original plan. We prefer to transfer the sludge into tanks as soon as practical.

The crates will be inspected and maintained under the current operating procedures for the 750 Pad until transfer to tanks is completed. The transfer has begun since we have four empty tanks available.

New tanks have been ordered, using the same specifications used for the existing tanks. Depending on procurement details, the first tanks could arrive on site in April. The tanks will be installed in Tent 6 and certified as was done for the existing tanks. The existing interim status allows up to 5544 cubic yards for tank storage, and we feel this volume will be adequate for our needs. The Part B modification application previously submitted will be revised to reflect the additional tanks. If we need to modify this permitting plan to reflect the Colorado Department of Public Health and Environment (CDPHE) action on the Part B modification, please let us know.

The new tanks will be installed and certified in the same manner as the existing tanks. The DOE expects to submit the certifications in two or three packages. As before, the DOE has authorized EG&G to deliver the certification packages directly to the CDPHE.
