Rocky Flats Plant Dam Inspections

George Setlock Director
Environmental Protection Management
EG&G Rocky Flats Inc

The Federal Guidelines for Dam Safety recommends including regular inspections of dams in a dam safety program. Intermediate inspections at least bi annually and a more comprehensive periodic inspection every 5 years are recommended. Dam inspections are a site operational function and as such EG&G is to assume the financial and administrative responsibilities for execution of the dam inspection program.

Over the last ten years these dam inspections have been accomplished through a series of 5 year Inter Agency Agreements (IAG) with the Omaha District Office U S Army Corps of Engineers. The latest IAG expired in March 1993. Additionally Headquarters DOE has a separate agreement with the Federal Energy Regulatory Commission (FERC) to periodically inspect qualifying dams at Rocky Flats Plant (A 2 A 3 A 4 B 5 C 2 and Sanitary Landfill). The FERC inspections are expected to continue.

EG&G is to propose a dam inspection program to satisfy the recommendations in the Federal Guidelines for Dam Safety and operating requirements at Rocky Flats Plant. EG&G is to respond within 4 weeks of receipt of this letter with a copy of the proposed Program to the Environmental Protection Division.

Phil Hartung at extension 3131 is the Rocky Flats Office point of contact.
