Mr. LeRoy Carlson
U.S. Fish & Wildlife Service
Colorado State Office
730 Simms Street
Golden, CO 80401

Dear Mr. Carlson:

Enclosed are the revised portions of the Final Operable Unit No. 13 (OU-13) Phase I RCRA Facility Investigation/Remedial Investigation (RFI/RI) Work Plan for the Rocky Flats 100 Area, per the Colorado Department of Health's (CDH) November 10, 1992 letter request. Included are revised chapters 3, 5, 6, and 7, a revised Table of Contents, and a Response to Comments insert. These are to be inserted into Volume I of the October 1992 Work Plan and replace the existing chapters. This meets the March 10, 1993 date requested in the CDH February 8, 1993 letter.

As you recall, the Final Phase I OU-13 Work Plan submitted to you in October 1992, was disapproved pending resolution of certain plant-wide issues that were in addition to specific comments to the OU-13 Work Plan. Conversations, meetings and correspondence between DOE, EG&G, and your staff substantially resolved these issues. As a result, you received a revised Standard Operating Procedure (SOP) GT:30 entitled, "In-Situ Characterization for Radionuclides Using High Purity Germanium Detectors" (HPGe) on March 8, 1993, and DOE will prepare and submit to you a Draft "Compendium of In-Situ Radiological Characterization Methods and Analysis" on the agreed upon date of April 2, 1993. The Benchmark Tables in Section 3 were completely revised and the tables will be updated at the time the Feasibility Studies are due for each individual OU. In addition, SOPs relating to surficial soil sampling and varied uses of the HPGe detector will be submitted prior to field implementation in OU-13.

If you have any questions, please feel free to contact Robert Birk of my staff at 966-5921.

Sincerely,

Robert H. Birk

for Richard J. Schassburger
Acting Director
Environmental Restoration Division
