August 9, 1991

Mr. Frazer P. Lockhart  
U. S. Department of Energy  
Rocky Flats Office  
P.O. Box 928  
Golden, Colorado 80402-0928

Dear Mr. Lockhart,

This letter is issued in response to your letter dated August 7, 1991 requesting an extension of the Interagency Agreement (IAG) schedule for the delivery of the final work plan for "Control of Radionuclide Levels in Water Discharges From Rocky Flats Plant".

We refer you to our joint letter of February 8, 1991 which confirmed a DOE, CDH and EPA understanding that "timely" requests for extensions must be submitted by DOE 14 days prior to the due date of the deliverable. The due date for the subject document is August 13th; therefore, the request for extension is not timely. Any future requests for extension must be timely.

Transmittal letters for all CDH and EPA comments designate a contact person to allow DOE to clarify agency comments. These persons have not been contacted in an attempt to resolve the technical issues prior to a request for extension. Any future requests for extension must be preceded by a dialogue between the designated technical personnel.

**ADMIN RECORD**

A-SW-000069

In recognition of the approximate three week extension granted for the submittal of the draft work plan, CDH and EPA will grant an extension of the due date for the final document to Monday, September 16, 1991. This will provide approximately five weeks, as of today's date, to finalize the document. CDH and EPA staff will be available to discuss and attempt to resolve relevant technical issues.

Sincerely,

Gary W. Baughman, Unit Leader  
Hazardous Waste Facilities  
Hazardous Materials and  
Waste Management Division

Martin Hestmark, Manager  
Rocky Flats Project,  
U. S. Environmental  
Protection Agency
