MEMORANDUM

To: ENVIRONMENT COMMITTEE
From: Stuart R. Ferguson, M.D., Chairman
Date: November 20, 1990
Subject: Request from Research and Development Strategy Task Force, DOE, Rocky Flats

The enclosed correspondence from the Department of Energy, Rocky Flats Office has been received and I am seeking your comments as requested in the letter from David Simonson. I believe that this affords the Medical Society the opportunity to express our interest in environmental issues and to also have a voice in the issues to be addressed. I urge you to respond.

These comments must be returned to Mr. Simonson by November 30 and I am requesting that you have your comments to the CMS office by November 27 so that they may be reviewed and compiled into a full committee response to meet this November 30 deadline.

Please feel free to FAX your comments, attention Marilyn Barton, to 779-8775.

Thank you for your help.
