**FORMATION OF TECHNICAL REVIEW GROUP FOR PUBLIC INVOLVEMENT IN ENVIRONMENTAL RESTORATION**

A letter dated April 15, 1991, was sent by Beth Brainard, DOE, RFO Public Affairs Officer, to local municipalities and interest groups, describing the Technical Review Group and inviting each of them to designate a representative to the group. As currently planned, the Technical Review Group will participate in work plan scoping and draft work plan review in support of the Environmental Restoration Program. The invitation letters, along with an overview of the scope and membership of the Technical Review Group, were sent to:

- City of Arvada - Lynn Easton, Mayor
- City of Boulder - Leslie Durgin, Mayor
- City of Broomfield - Robert J. Schulze, Mayor
- City of Golden - Marvin Kay, Mayor
- City of Northglenn - Don Parsons, Mayor
- City of Thornton - Marjorie Clement, Mayor
- City of Westminster - George Hovorka, Mayor
- Boulder County Commission - Homer Page, Chairman
- Jefferson County Commission - John P. Stone, Chairman
- Citizens Against Nuclear Disinformation in Denver - John Fleissner, President
- Communities Uniting for Environmental Safety - Glenna Smith, President
- Rocky Flats Cleanup Commission - Joe Tempel, President
- Rocky Flats Environmental Monitoring Council - Sam Williams, Chairman

The letter asked the recipients to identify a representative and to provide the name of the representative to Jill Paukert, EG&G Community Relations. Two invitees declined to participate - the City of Boulder and Communities Uniting for Environmental Safety. A designee has not yet been provided by the City of Thornton. The list of designated representatives is as follows:

- City of Arvada - Callie Videtich, Environmental Analyst
- City of Broomfield - Kathy Schnoor, Environmental Chemist
- City of Golden - Katie Richards
- City of Northglenn - Neil Renfro
- City of Westminster - Susan Nachtrieb, Water Quality Coordinator
- Boulder County Commission - Todd Saliman, Policy Analyst

*City of Thornton - Jim Gindelberger (added 6/10)*

Jefferson County Commission - Jean Jacobus, Policy Analyst  
Citizens Against Nuclear Disinformation in Denver - Keith Motyl  
Rocky Flats Cleanup Commission - Ken Korkia, Executive Director  
Rocky Flats Environmental Monitoring Council - David Boon

The first meeting of the Technical Review Group will be held Tuesday, June 11, 1991, from 1:00 p.m. to 4:00 p.m. in Building 060 at the Rocky Flats Plant. The representatives have been contacted by telephone about the meeting.

Based on conversations we have had with the representatives of several municipalities, we anticipate that much of the meeting will be spent discussing the scope, membership and schedule of the group. In general, the municipalities have expressed interest in assisting with documents other than work plans. At the same time, they are concerned about their ability to participate effectively given the expected workload and the lack of adequate staff within their municipalities.

The remainder of the meeting will focus on Operable Unit No. 3, for which a work plan is being developed. A discussion led by Michael Guillaume, EG&G Remediation Programs, will consider how and when the Technical Review Group will participate in this work plan effort.

If you have any questions about the Technical Review Group and its status, please call Jill Paukert at x6160.

## ROCKY FLATS PLANT TECHNICAL REVIEW GROUP

**OBJECTIVE:** The Rocky Flats Plant Technical Review Group (TRG) will provide for early community involvement in environmental restoration projects through participation in work plan scoping and draft work plan review.

**MEMBERSHIP:** The TRG will comprise a total of 20 to 25 participants who can analyze and discuss the plant's environmental restoration projects, specifically CERCLA Remedial Investigations and Feasibility Studies and RCRA Facility Investigations and Corrective Measures Studies, on a technical level. One representative of each of the following entities will be invited to participate:

- Rocky Flats Environmental Monitoring Council
- area municipalities (Arvada, Boulder, Boulder County, Broomfield, Golden, Jefferson County, Northglenn, Thornton and Westminster)
- Rocky Flats Cleanup Commission
- Citizens Against Nuclear Disinformation in Denver
- Communities Uniting for Environmental Safety

Where necessary, the following entities will provide two representatives each, a primary representative who will participate on a regular basis and a secondary technical representative with expertise concerning a particular operable unit (OU) who will participate when that OU is under consideration by the TRG:

- U.S. Department of Energy
- U.S. Environmental Protection Agency
- Colorado Department of Health
- EG&G Rocky Flats, Inc.

Two positions on the TRG will be reserved for OU-specific representatives who will be invited by the U.S. Department of Energy with the concurrence of the TRG. These participants could include representatives from universities or state or local agencies. Additionally, a representative of EG&G Rocky Flats Community Relations will participate as a meeting moderator. The U.S. Department of Energy will not financially compensate individuals or organizations for their participation in the Technical Review Group.

**SCOPE/FORMAT:** The TRG will meet at least once a month to participate in work plan scoping and draft workplan review sessions. The group will function within the schedules established by the Interagency Agreement.

The U.S. Department of Energy will take responsibility for meeting logistics, such as notification and meeting place arrangements. Meetings will be held during normal business hours and will generally last approximately one-half day. TRG meetings will be held at the Rocky Flats Plant in building 60 unless precluded by scheduling conflicts.
