NEPA DOCUMENTATION FOR PROPOSED NEW SUPERCOMPACTOR - JEE-0244-91

In a meeting on August 26, 1991, DOE informed EG&G that they had determined that an Environmental Assessment (EA) is required for the proposed new supercompactor, and that EG&G should begin work on a draft EA once sufficient details on the proposal are available.

We plan to have a draft EA available for RFO's review on an accelerated schedule, subsequent to receipt of the details describing the proposed action. Following incorporation of RFO's comments, the draft will be available for DOE, HQ review.

This letter documents instruction provided by the DOE to EG&G Rocky Flats. We will proceed with preparation of a draft EA. If you would like further information, please contact Dale Shepherd, X5913, Project Manager for the proposed new supercompactor, or Steve Nesta, 273-6076, NEPA Division.
