Waste Determination and Disposition of Environmental Restoration Investigative Derived Materials

Ned Hutchins, Acting Associate General Manager
Environmental Restoration Management
EG&G Rocky Flats, Inc

Environmental Restoration is concerned with the slow pace of waste determinations and final dispositioning of the thousands of gray drums containing Investigative Derived Material (IDM) across the plant site. We understand that the Colorado Department of Health (CDH) is also unhappy with the management of these drums and is considering enforcement action to encourage resolution of this issue. It is my understanding that EG&G is responsible for making timely waste determinations on all IDM, based on the available data. It is also my understanding that DOE/RFO and CDH have had numerous ongoing discussions related to the management of IDM for an extended period of time. I therefore request that you provide me with a plan for complete and immediate waste determinations on all existing drums in the IDM inventory and an action plan to determine the final disposition of such drums within 10 days of the date of this letter.
