RESPONSE TO COMMENTS (13980) - SGS-667-93

Attached please find responses to comments made in the referenced memorandum (EG&G Responses to Environmental Protection Agency and Colorado Department of Health Comments on Statistics Strawman (NMH-606-93) dated November 30, 1993)

All of the comments have been addressed in the attachments to this letter, with the exception of comments 9 and 10 of the Colorado Department of Health comments dated October 13, 1993. We request a meeting between EG&G personnel and B K Thatcher of the Department of Energy, Rocky Flats Office early in January 1994 to resolve comments 9 and 10. EG&G will contact Mr Thatcher to arrange this meeting.

This letter has three attachments. Attachment A contains the responses to the earlier Environmental Protection Agency and Colorado Department of Health comments, which addressed Dr Gilbert's proposed methodology. Attachment B contains responses to agency comments on the Strawman document and Attachment C contains the statistical methodology itself, both attachments B and C were modified per the referenced letter.

Although comments 9 and 10 of the Colorado Department of Health comments remain outstanding, we plan to proceed with the background data comparison methodology as presented in Attachment C, to minimize schedule impact. If you have any questions or require further information please call Steve Needler of Environmental Engineering & Technology at X6961.

S G Stiger
Associate General Manager
Environmental Restoration Management
