## EXHIBIT B

### OU 3 RF/RI SAMPLING ACTIVITY DESCRIPTIONS -J. R. Coleman

Operable Unit 3 (OU 3) is defined as the area offsite from the Rocky Flats Plant. The planned OU 3 sampling activities are detailed in a Work Plan that outlines the purpose, objectives, rationale and methods used to evaluate the presence or absence of contamination within OU 3. The Work Plan is based on the requirements of the Interagency Agreement (IAG) between the Department of Energy (DOE), the Environmental Protection Agency (EPA) and the State of Colorado Department of Health (CDH). This Work Plan is publicly available and information concerning the location of an available copy can be found by calling EG&G Community Relations at 966-2986

OU 3 sampling activities began in April, 1992 and are scheduled for completion by spring of 1993. A Final Report which details the results and conclusions from this study is scheduled for completion in January, 1994.

The map, attached to this correspondence, shows the location of sampling activity. The sample location will be surveyed prior to the sampling event. Field adjustments could be made at the time of sampling to adjust specific sampling locations.

Sampling activities will not adversely effect your property. OU 3 sampling activities on this property involve collection of surface soil sample. The collection of surface soil samples involves removing one quarter to one half inch of surface soil from a 3 X 3 inch square in 25 locations within a ten acre plot. The approximate ten acre plot location is shown on the Exhibit A map.
