DOE to Conduct 2nd Public Meeting to Discuss Final Cleanup Recommendations for Rocky Flats

Broomfield, Colo., August 7, 2006 – The U.S. Department of Energy Rocky Flats Project Office, the U.S. Environment Protection Agency, and the Colorado Department of Public Health and Environment will host a second public meeting to discuss the final cleanup decisions for the Rocky Flats Site.

The informal public meeting on the Proposed Plan for the final remedy in the cleanup of the Rocky Flats Site will be held at 6 p.m. on Tuesday, August 8 at the Westminster City Park Recreation Center Community Room, 10455 Sheridan Blvd., Westminster, 303-460-9690.

A formal public hearing to take verbal and written comments will be held in Arvada on Aug. 31, 2006.

Representatives from the three agencies will discuss and answer questions regarding the Proposed Plan and how the conclusions and data in the Remedial Investigation/Feasibility Study/Comprehensive Risk Assessment (RI/FS/CRA) support the preferred alternative for the final remedy.

The Proposed Plan is a required document used to facilitate public involvement in the CERCLA (Superfund) remedy selection process. The document presents the Department of Energy's recommendation concerning how best to address contamination at the site, presents alternatives that were evaluated, and explains the reasons the preferred alternative is recommended. Although most of the environmental remediation has been completed at Rocky Flats and is expected to satisfy regulatory requirements, the DOE must complete the regulatory process with fair consideration of public input.

The DOE will solicit public comment on the Proposed Plan during the 60-day formal comment period on the Proposed Plan that will run through Sept. 13, 2006, and may select a remedy other than the preferred alternative based on public comment. The final decision regarding the selected remedy is documented in the Corrective Action Decision/ Record of Decision (CAD/ROD) after the DOE has considered all comments from both the regulatory agencies and the public.

Written comments may be mailed to the following address:
